- Value for investments and better communication on products/services features and capabilities.
- What subscriptions and/or products provide increased value in the cloud?
- Value of price agreements for products and services across jurisdictions including licensing and change of management implications.
- Microsoft to provide feedback on the timing of changes to services and architecture.
 This would include addressing issues with understanding and adjusting to Microsoft's licensing and pricing changes.

Company and Product Direction

Objective:

To understand company and product directions that jurisdictions need to know about and be taking into consideration in the future.

- Better understanding of Microsoft's new model and new generation of technology (telecommunications, social networking in open source, etc.)
- Microsoft's Roadmap (6-12 months) indicating architecture of services where there are changes to privacy and security (e.g., data sovereignty issues where there are plans to move dependent 'microservices' out of country and security certification changes).
- How does Microsoft protect enterprise's data and provide security solutions?
- Can Microsoft provide a complete Enterprise Content Management system through the products they have available at this time?
- Discuss replacement strategy for end of life products.

Collaboration

Objective:

This session is open to participants from members' jurisdictions (via WebEx OR teleconference)
