

Public Sector Chief Information Officer Council

Jurisdictional Information Sharing

Background:

At the PSCIOC teleconference of January 24th, 2017, Bette-Jo Hughes, PSCIOC Co-Chair, asked members to consider allocating time (30 minutes) at each of the monthly PSCIOC teleconference agenda for jurisdictional information sharing. Members would be invited to present their jurisdictional update on a rotational basis during the monthly teleconferences. This suggestion is being brought forward for members' consideration as a result that the time allocated for this item at the in-person meeting is not sufficient given the number of members and time available. By having jurisdictional updates during monthly teleconferences, in addition to time that is allocated on the in-person meeting agenda, would ensure that each jurisdiction is given the opportunity and sufficient time to present their jurisdictional update.

At this meeting, there was also a suggestion that instead of a jurisdictional update, as per current format, for members to be invited to present on a particular topic or question of interest during the monthly teleconferences. Topics/questions would be determined by PSCIOC members in advanced. *The ICCS Secretariat would still continue to request information sharing updates from members for each of the in-person meetings.*

Options for discussion/decision by PSCIOC members:

Option #1:

Jurisdictional Information Sharing would be extended to monthly teleconferences (*30 minutes to be allocated on agenda*). PSCIOC members will be invited to present on a rotational basis. *The time allocated for information sharing at the PSCIOC in-person meetings would be prioritized to those members that have not presented during teleconferences.*

Option #2:

During the monthly PSCIOC teleconferences, members would be invited to present on a particular topic or question of interest in lieu of the current information sharing format. Topics/questions of interest would be determined by PSCIOC members in advanced. *The ICCS Secretariat would still continue to request information sharing updates from members for each of the in-person meetings.*
