Information Sharing Roundtable <ul style="list-style-type: none">Follow up from September meeting <i>(members that were unable to present in September)</i>	Phoenix Pay System <ul style="list-style-type: none">Lessons learned on the Phoenix pay system (action item) Presentation by Infrastructure Canada on Smart Cities (action item)

Topics of interest that have been identified by members for inclusion in teleconference/meeting agendas:

- Software as a Service (SaaS)
- Business Intelligence, Analytics, and Identity. Where we are on delivering identity services.
- Digital Government Initiative / Transformation (feedback on journey)
- Top 10 trends in IT & Digital (what we are all doing in each of these areas)
- Are you embracing Design Thinking and Human Centered Design
- **Identity/Authentication service to protect and enable citizens (and businesses) in wider digital world**
 - Private Industry presents lots of cautions around the use of personal information with the profit motive in mind
 - The Joint Councils has done some excellent work on interoperability standards
 - Citizens find it increasingly hard to navigate the various services they access online, safely manage their login credentials and manage their digital identity for non-governmental needs
 - Should we be considering an approach, possibly with Blockchain, in which a trusted ‘utility’ or other 3rd party actor (separate from government and private industry) can offer Identity and authentication as a service utilizing the identity information resident within governments? Perhaps a framework that guarantees independence from government (big brother) and creates a 3rd party audit/oversight to ensure compliance.
