

PSSDC Information-Sharing Template – February 2020

Information Sharing is collected for the purpose of the PSSDC Meeting of February 2020.

Information contained in this document cannot be shared outside of the PSSDC without the approval of the member jurisdiction (author).

Jurisdictions are kindly requested to limit information sharing to a maximum of 3 pages.

Jurisdiction:	Contact
<p>1. <u>Priorities & Accomplishments:</u></p> <ul style="list-style-type: none"> Briefly describe what your jurisdiction sees as its top 2-3 service delivery priorities/initiatives over the next 6-12 months, and steps you intend to take to address these priorities. Briefly describe any significant service delivery accomplishment, progress, and/or milestone achieved in these priority areas over the last 6-12 months. 	<p>1. <u>Business Number and Tell Us Once</u></p> <p><u>Business Number</u> - Since September 2019, five federal departments have signed the Terms of Use to use Business Number (BN) identity information to support service delivery using the BN Web Validation Service. This increase the number of agreements to 44. The April 2020 target date for compliance with the Directive on the BN fast complying, ISED, in collaboration with the CRA, will continue to support departments adopting the BN. Over the next fiscal year, ISED will also explore proof of concepts, prototypes and pilots to demonstrate how the BN can enable Tell Us Once.</p> <p><u>Tell Us Once Prototype</u> - ISED is undertaking a Tell Us Once prototype to demonstrate trusted digital identity and a Tell Us Once approach across two discrete services. ISED is partnering with the Treasury Board Secretariat and Vivvo, a Saskatchewan-based innovator company identified as part of the Build in Canada Innovation Program, to develop the prototype. The prototype will be completed in June 2020. ISED will share the results of the prototype with PSSDC upon completion.</p> <p><u>Digital Credential and Wallets</u> - Digital credentials and wallets will enable individuals and business to quickly and easily provide services and regulatory bodies with the information needed to determine eligibility for those services, to comply with regulations and to prove their ability to conduct activities such as importing and exporting. Individuals and businesses would hold these digital credential in their own digital wallets, putting them in control with whom they share their information, consistent with the principles established in Canada's Digital Charter. Gaps remain which affect the portability of the information between individuals, businesses and governments. This can create challenges where the credentials and claims from one entity may not be recognized by another entity, particularly with cross-jurisdiction transactions and international trade. The near term priorities for addressing these gaps are:</p>

	<ol style="list-style-type: none"> 1. Work with provinces and territories to issue and accept credentials across jurisdictions; and 2. Work with provinces and territories to develop standards around credentials and wallets, to help ensure interoperability and support across jurisdictions. <p><u>Pan-Canadian Trust Framework (PCTF)</u> – ISED continues to lead components of the PCTF including Verified Organization (VO) and Verified Relationship (VR). Atomic processes and conformance criteria relating to establishing and verifying the identity of a registered organization was integrated into the Public Sector Profile in June 2020. ISED will continue advancing this work by establishing the requirements for:</p> <ol style="list-style-type: none"> 1. Processes and conformance criteria for establishing and verifying the identity of unregistered businesses. 2. Processes and conformance criteria related to confirming the authority of an individual to act on behalf of organizations. <p>This work will be advanced through a small working group, including ISED, Veterans Affairs, Canada Revenue Agency (CRA), City of Montreal, North West Territories and British Columbia.</p>	
<p>2. <u>Showcase Opportunity:</u></p> <ul style="list-style-type: none"> • List any significant deliverable(s), resource(s) or application(s) that you would like to present as a showcase item at an upcoming meeting or teleconference. • Please provide a brief description of the item(s) to profile, time required and any other relevant information. 	<p>Not available at this time</p>	
<p>3. <u>Issues / Needs:</u></p> <ul style="list-style-type: none"> • Briefly describe any service delivery issue(s) you are trying to solve that interjurisdictional collaboration can help to advance (e.g. pilot). • If available, provide details on problem statement, project scope 	<p>The aforementioned PCTF work would benefit from contacts within jurisdictions that provide online service to business, and that would be willing to alpha test developed PCTF.</p>	

and targeted outcomes/deliverables.
